Menti

In one or two words, what should be the primary role of UK zoos in native species conservation?

Facilitator	Breeding and Education	Education and awareness
Protection	Education	Reintroduction
Genetic safety net and educational tool	Education & research	Breeding for reintroduction
Monitoring	Education/conservation	Breeding in numbers
Reintroduction	Education & protection	Education Habitat

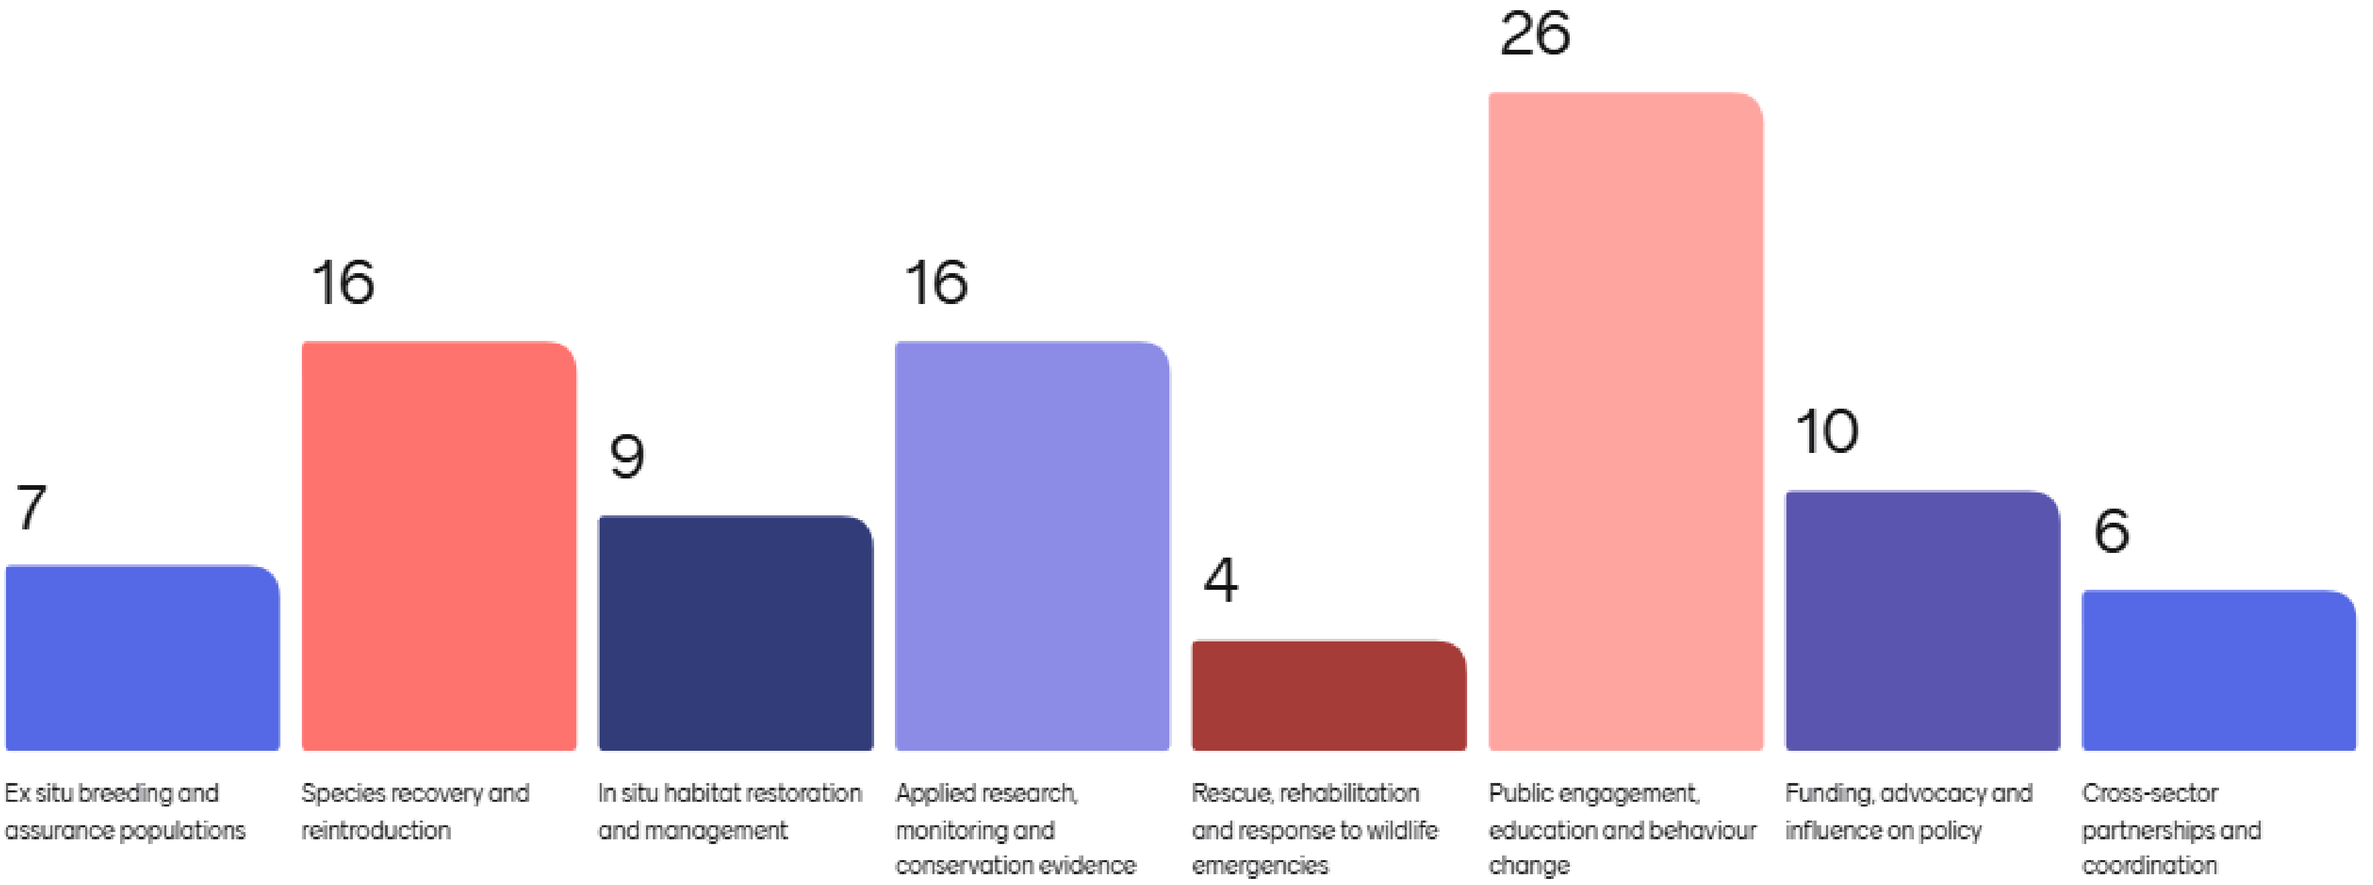

Menti

How would you rate the current contribution of UK zoos to native species conservation?

Menti

Which areas should UK zoos prioritise to make the greatest contribution to native species conservation?

Menti

What is one specific example of work you or your organisation are delivering or supporting that contributes to the conservation of UK native species?

Water vole supplier; we release 3k+ a year

Advocacy

Wildlife rehabilitation and release / harvest mouse breed and release

Species reintroduction projects

Education and communication

Sighting recording

Habitat Management Work Parties

We breed and release 60ish turtle doves a year

Genetic diversity preservation

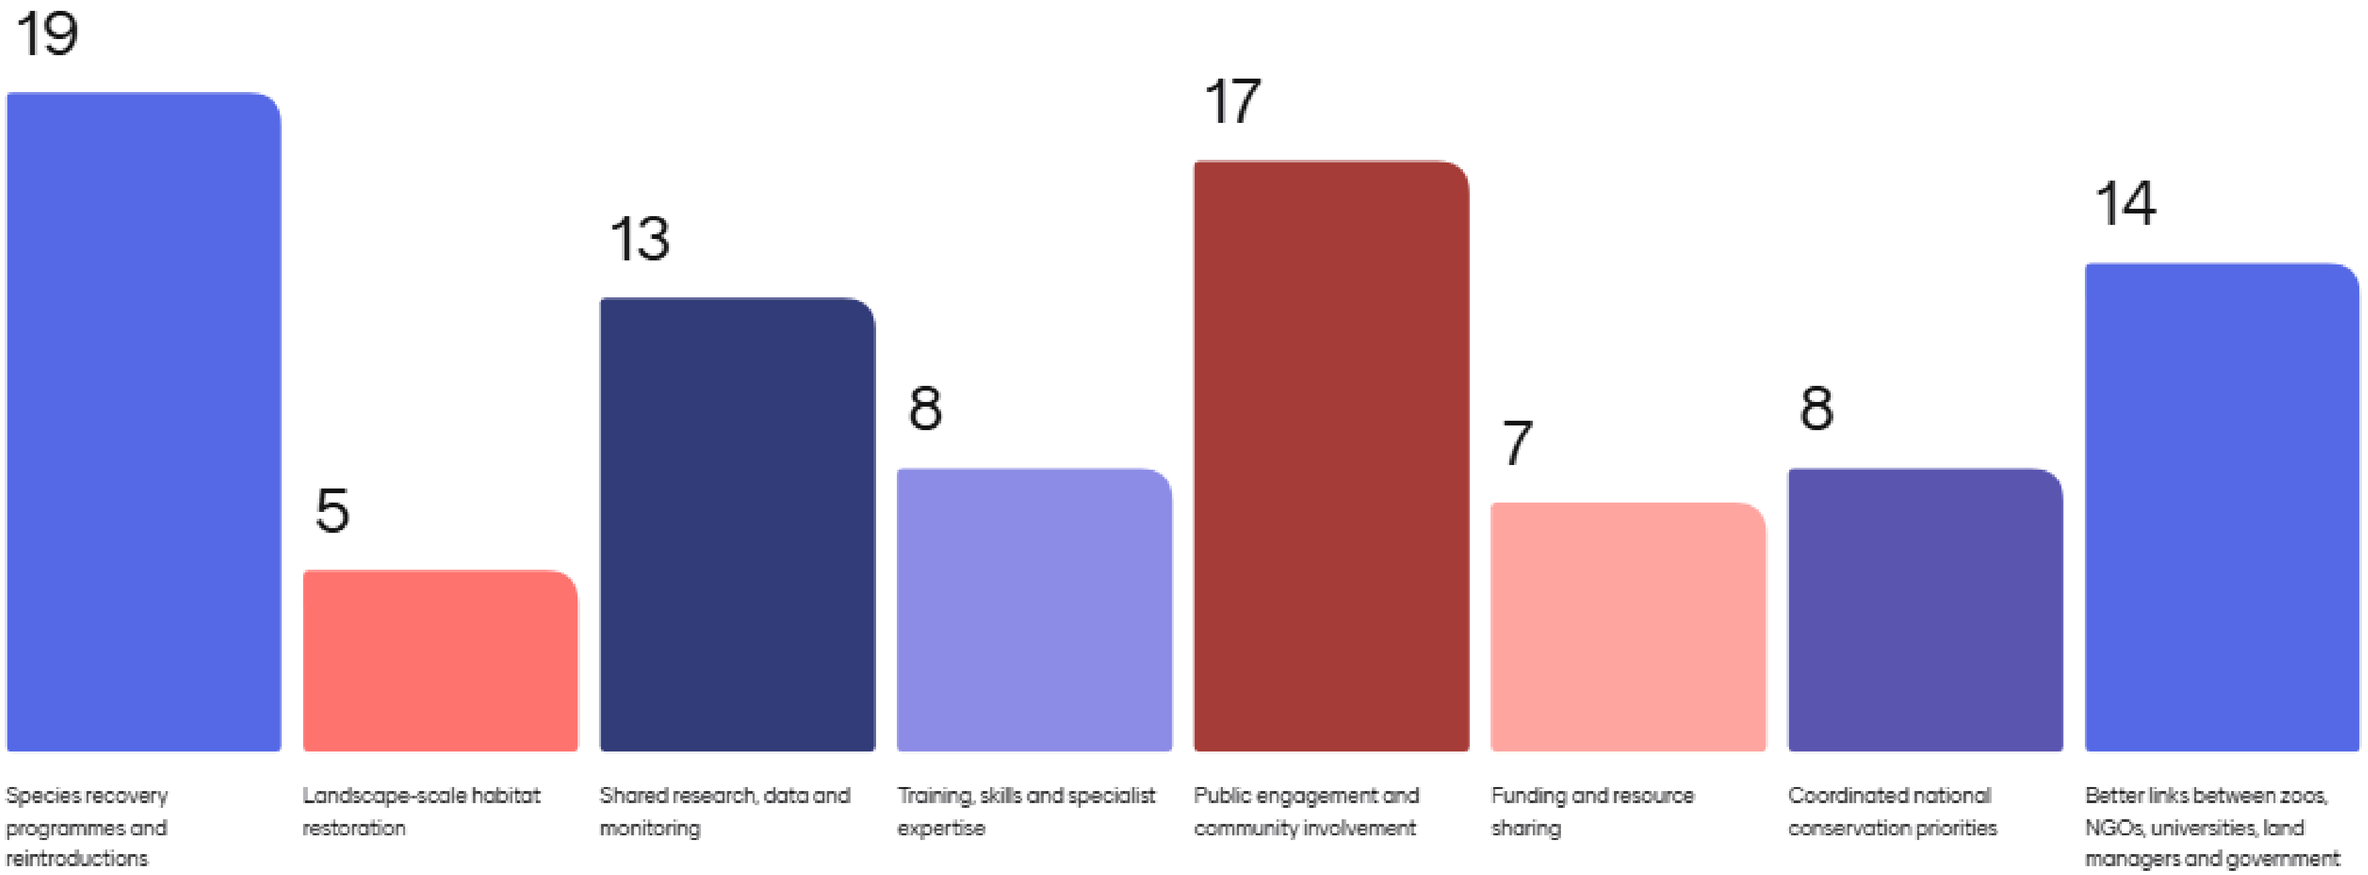

Animal Education blog

I work for Derek Gow...

Conservation module and conservation site

Menti

Where could UK zoos add the greatest value to native species conservation by working with other organisations?

What is the biggest barrier preventing UK zoos from making a greater contribution to native species conservation?

Menti

What is one practical action, change or collaboration that would help UK zoos make a greater contribution to native species conservation?

You extract money from public; you are the start of a cashflow pipeline

Work with in situ partners

More available funding

Educational programmes

A better government

In situ and ex situ breeding

Targeted funding

Interactive experiences

Events like this to encourage collaboration

more education on native species

Policy change

More emphasis on education

education opportunities

Public awareness of the need for native conservation = more funding

Partnerships
